

# LEED for General Contractors/Construction Managers

Presented by the U.S. Green Building Council

This course is designed to help general contractors and construction managers understand LEED® as it relates to their project role, with a focus on technical requirements (particularly materials, resources, and indoor environmental quality credits). The course includes strategies for general contractor and subcontractor documentation and costs tracking.

## LEARNING OBJECTIVES

After completing this course, you will be able to:

- Identify the intent of the technical requirements as they apply to the design and construction team, particularly regarding the materials, resources, and indoor environmental quality credits.
- Implement strategies for general contractor and subcontractor documentation
- Know where to go for additional resources and support

## WHO SHOULD ATTEND?

Industry professionals seeking to increase their understanding of LEED® rating systems and green building strategies, benefits and resources:

- Architects
- Engineers
- Designers
- Manufacturers
- Developers
- Owners
- Consultants
- Contractors
- Government Officials

## LEARNING LEVEL

This is a 200-level course and prior knowledge of LEED is recommended. Consider *Green Building Basics and LEED* as a prerequisite.

## CONTINUING EDUCATION CREDITS

AIA/CES HSW/SD LU:	3.5
