

State Level Programs

The following list is of programs that support greening schools on a state level.

Austin Energy Efficiency Programs and Offerings

Austin Energy's portfolio of energy efficiency programs is among the most comprehensive in the nation. The programs and offerings serve homeowners and businesses. Austin Energy's energy efficiency programs and offerings date back to 1982. Combined, they have saved more electricity than the annual output of a 500 megawatt power plant. A 500 megawatt power plant can power 50,000 homes.

Watt Watchers of Texas

Watt Watchers of Texas is a free energy efficiency program for Texas schools sponsored by the Texas Comptroller of Public Accounts, State Energy Conservation Office, and the U.S. Department of Energy. The program is designed to help school districts save energy and money by getting students involved. It is simple and effective! Students patrol the halls of the schools reducing energy waste by turning off lights and leaving "tickets" for empty classrooms with the lights on.
